Collaborative, professional, integrative - your resource for EP research, training & global impact

What is energy psychology?

Energy psychology (EP) is a mind-body approach to understanding and improving human functioning. EP focuses on the relationship between bioenergy systems, neuro and electro physiological processes, and mental functions involving thoughts, emotions, sensations, and behavior.

How can energy psychology enrich my practice?

Are some of your clients stuck, despite your best efforts? By working with the whole body-mind system, energy psychology facilitates rapid positive change and optimal psychotherapeutic outcomes, and is aligned with the latest findings from neuroscience and traumatology.
