In the last 500 years the western- educated world believed that the **BRAIN IS THE "CONDUCTOR" LEADING THE SYMPHONY** of functions that keeps us alive and well. It's what we've been taught. It's what we've been led to believe. It's what teachers have stated with authority.

According to The Anatomy of the Brain on the site for the Mayfield Clinic, it beautifully illustrates this perspective.

It states: **This mysterious three-pound organ [the brain] controls all necessary functions of the body, receives and interprets information from the outside world, and embodies the essence of the mind and soul. Intelligence, creativity, emotion, and memories are a few of the many things governed by the brain.**

The belief that the brain is the control center for the body, the emotions, and memories has been so universally accepted and so deeply ingrained in our psyches that it's been taken for granted almost without question—that is, until now.

**THE HEART IS MORE THAN A PUMP**

While our hearts obviously do pump the blood that nourishes our organs and each of the 50 trillion or so cells that make up our bodies, recent discoveries suggest that the purpose of the heart may reach far beyond the function of a pump.

The benefits of harmonizing our hearts with our brains to empower us with deep intuition, precognition (knowledge of future events), and the direct wisdom of heart intelligence can immediately catapult us beyond traditional thinking when it comes to the way we live and solve our problems.

It's these capabilities, as well, that provide the resilience to embrace big change in our lives and to do so in a healthy way.

## HAVE WE LOST OUR HEARTS?

Our ancestors knew that the heart had energy (a powerful energy) and that it conveyed deep wisdom. However, as the human species developed its brain, it began to lose sight of its heart. At this point in history as we venture into space, create global communication, and invent all sorts of technological tools and toys, we are poised to destroy ourselves, our children, and everything around us. Have we simply lost our minds, or have we lost something deeper? Have we lost our hearts?
